Experience

Freelance UI/UX Designer | August 2025 - Present

Self Employed / Remote

- Designed web and mobile experiences for SaaS, workforce management, travel, and e-commerce platforms using Figma.
- Developed user flows, wireframes, prototypes, and scalable design systems to ensure consistent and intuitive user experiences.
- Conducted UX improvements focused on navigation, accessibility, visual hierarchy, and conversion optimization.

Freelance Web Developer | June 2023 - Present

Self Employed / Commission-based / Remote

- Developed custom web applications including appointment management systems, survey platforms, document management systems, and business information systems.
- Designed and implemented database structures, administrative dashboards, and workflow automation features to improve operational efficiency.
- Managed the complete development lifecycle from requirements gathering and UI implementation to testing, deployment, and maintenance.

Web Developer (Intern) | February 2025 - May 2025

Split Second Software Services Corporation | Malaybalay City, Bukidnon, Philippines

- Developed a full-stack web application for the company platform, implementing front-end designs, back-end logic, and database systems.
- Executed QA testing and survey validation by creating MCQ modules, ensuring software reliability and 100% code integrity via GitHub version control.

Technical Projects

Web & Software Development Projects

- Web-Based Rating and Survey System for LGU Tubod:** Built a citizen feedback and service evaluation platform in **Laravel**, **React.js**, and **Tailwind CSS** that enables data collection, satisfaction monitoring, and reporting for local government offices.
- JB's Creation - Event Gallery Website:** Developed a responsive event gallery website using **React**, **TypeScript**, **Tailwind CSS**, and **Vite** to showcase events and client experiences.
- DERU - E-Commerce Storefront:** Developed a modern e-commerce platform using **React**, **TypeScript**, **Tailwind CSS**, and **Vite** with product catalog and shopping cart functionality.
- Migeru Build Engineers Website:** Developed a responsive corporate website for a construction company to showcase services, projects, and strengthen digital presence.
- Maison (E-Commerce Platform):** Developed a scalable, AI-inspired frontend using **React.js**, **TypeScript**, and **Tailwind CSS**, optimizing UI performance and modern user experiences.
- Web-Based Appointment and Management System (Capstone):** Engineered a full-stack **Laravel**, **Bootstrap** and **MySQL** solution to automate patient scheduling, records management, and clinic operations.
- Interactive Image Editor:** Implemented a real-time web editor with **Laravel**, **Vue.js**, and **Tailwind CSS**, featuring advanced interactive components including lasso, poly-lasso, and brush functionality.
- Journal of Science:** Created a **CodeIgniter**, **Bootstrap** and **MySQL** system supporting digital publication workflows and multi-level user management.
- Document Management System:** Built a secure **ASP.NET & MySQL** system with role-based access control (RBAC) and optimized file retrieval workflows.
- POS & Inventory System:** Built a robust **VB.NET & MySQL** application to optimize sales processing, inventory tracking, and real-time reporting.

UI/UX Projects

- **LGU TUBOD Client Satisfaction Measurement (Wireframe):** Created wireframes and user flows for a government feedback platform to streamline citizen satisfaction monitoring and service evaluation.
- **Epione - Mental Health Service Landing Page (UI Design):** Designed a responsive mental health landing page focused on accessibility, user engagement, and conversion optimization.
- **Wanderly Travel App (UI Design):** Designed a landing page UI for a travel app using **Figma**.
- **FARMURA Super App (UI/UX Design):** Designed a multi-service super app and administrative dashboard in **Figma**, creating scalable user flows, wireframes, and high-fidelity interfaces for trade, travel, and community services.
- **Wine Price Edge (UI/UX Design):** Developed a UI/UX concept for a comparison platform in **Figma**, focusing on automated workflows and complex data visualization.
- **DM Resto (UI/UX Design):** Modernized a POS interface using **Figma** to enhance operator speed, usability, and overall system efficiency.

Core Skills

-
- **Languages & Frameworks:** PHP (Laravel, CodeIgniter), ASP.NET, VB.NET, JavaScript (React.js, Next.js, Vue.js), Java, Python, TypeScript.
 - **Web & Software Development:** Full-Stack Development, MVC Architecture, RESTful APIs, Responsive Web Design, CI/CD.
 - **Databases:** MySQL, PostgreSQL, Firebase, Database Design, Query Optimization.
 - **UI/UX & Design Tools:** Figma, Flutter, Wireframing, Prototyping, User-Centered Design.
 - **Tools & QA:** Git, GitHub, Unit Testing, System Diagnostics, QA Testing, Debugging, System Deployment.
 - **Soft Skills:** Analytical Problem-Solving, Emotional Intelligence, Team Collaboration, Adaptability.

Volunteer Experience

DEVCON Philippines – Bukidnon Chapter | *October 2024 - Present*

- **Stage Manager Committee:** Managed event flow and technical support for the **NASA Space Apps Challenge** and **BICTC**, ensuring seamless execution of live presentations and judging sessions.
- **Developer & Designer:** Built rapid-prototypes in high-pressure, collaborative environments during **Techstars Startup Weekend**, focusing on user-centered design and functional MVP development.

Education

Central Mindanao University | *2021 – 2025*

Bachelor of Science in Information Technology - Major in Software Development
