EXPERIENCE

Freelance UI/UX Designer *August 2025 – October 2026*
Self Employed / Remote

- Designed user-centered web and mobile interfaces for SaaS and e-commerce platforms using Figma, translating complex business requirements into intuitive layouts that successfully increased user session duration.
- Architected user flows, interactive prototypes, and scalable design systems, ensuring visual consistency and reducing front-end development handoff time.
- Optimized navigation and accessibility features through iterative UX analysis, improving platform usability and reducing user drop-off rates during checkout.

Freelance Web Developer *June 2023 – September 2026*
Self Employed / Commission-based / Remote

- Developed custom web applications, including appointment and document management systems, automating daily operations for small business clients and improving task completion speed.
- Engineered relational database architectures and administrative dashboards, improving overall data management efficiency and reducing manual data entry steps.
- Managed the full software development lifecycle (SDLC) from initial requirements gathering to deployment, ensuring timely project launches and maintaining a 100% client satisfaction rate.

Web Developer (Intern) *February 2025 - May 2025*
Split Second Software Services Corporation | Malaybalay City, Bukidnon, Philippines

- Built full-stack web application features by integrating front-end interfaces and back-end systems, significantly contributing to on-schedule project delivery.
- Executed quality assurance testing, survey validation, and module configurations, identifying system defects early and ensuring stable application performance.
- Maintained project source code and resolved software bugs using GitHub version control, enhancing code integrity and preventing merge conflicts during collaboration.

EDUCATION

Central Mindanao University *2021 – 2025*

Bachelor of Science in Information Technology - Major in Software Development

CERTIFICATES

Cisco Networking Academy - JavaScript Essentials 1 and 2, Python Essentials 1 and 2, Data Analytics Essentials, Introduction to Data Science, IT Customer Support Basics, CSS Essentials, HTML Essentials
